

## **OUR MISSION STATEMENT**

Consummate Care is a Domiciliary Care agency which aims to provide care, support and development opportunities for people who need help in various forms usually because they cannot wholly look after themselves. We fully support the client by helping to promote a way of life which permits them to enjoy, to the greatest possible extent, their rights as a human being. We value the input by families and other responsible people with an interest in the client's well-being as we design each individual programme of care.

The service we offer is delivered in various ways, dependent on the need of the individual. It can range from offering respite or care within the home, accessing the community in a wide range of familiar activities to exploring new and challenging activities plus the provision of personal care. We also aim to support the client in their development in every day living for those who seek to be more independent.

This service is provided for children and adults with learning disabilities, physical disabilities, sensory impairment and mental health problems of all ages.

We fully support the client by helping to promote a way of life for them which permits them to enjoy, to the greatest possible extent, their rights as a human being. The following rights are fundamental to our work:

**Privacy, Dignity, Independence, Security, Civil Rights and Choice**
